MONITOR
Intelligent tracking

MONITOR is a powerful platform that combines physical infrastructure with software, sensors, digital technology, bots, and artificial intelligence to monitor your cargo.

Availability 24/7

Get an automated platform with 24/7 availability that monitors your cargo.

Constant Learning

We are constantly updating Monitor to meet the business requirements.

Constant innovation

Be part of our platform and live the experience of innovation through our R&D team.
MAYASOFT

Do not expose your cargo anymore!

MONITOR constantly and effectively tracks your cargo, generating notifications and alerts that allow your traffic controllers to act quickly on any updates.

MONITOR consolidates your routes on a single platform, giving you greater control of your fleet and its loads.

Regardless of **the GPS Brand**

Regardless of the GPS brand used by your vehicles, we can monitor the exact location and know in detail every update.

Save time **in monitoring**

By automating repetitive tasks, we optimize the monitoring process by making your traffic controllers focus on solving the critical news of your cargo.

Receive **notifications** instantly

Immediately share the status of your loads with your clients.

No investment in **infrastructure** or licensing required

MONITOR incorporates the necessary infrastructure to be able to start instantly without the extra costs for hosting or licensing.

MONITOR
is simple to configure and easy to use

MONITOR is easily integrated into your internal systems; its friendly design makes it very easy to understand and use enabling your team to:
- Schedule routes.
- Monitor traffic.
- Send notification and alerts.
- Deliver digital evidence.
- Evaluate the service.

500% **productivity increase and optimize costs**
